

EOT CRANES

We manufacture a wide range of EOT cranes that are available with a box type construction for bridge girders. Our range of EOT cranes has a tapered plate design that is used for joining the end carriages to the girders and also ensures smooth flow of stresses. Following are the features of our range of EOT cranes:

- * High speed operation
- * High productivity
- * Corrosion resistant
- * Energy Efficient

We can make products as per customer's specifications / requirements

All Specifications are subject to change towards improvements without any prior notice.

Manufactured by ABM Cranes and Export Marketing by ABM Tools
